ESTIMATES OF LABOUR INCOME
JANUARY 1971

Published by Authority of
The Minister of Trade and Commerce

DOMINION BUREAU OF STATISTICS
Labour Division
Employment Section

April 1971
8003-511

Price: 20 cents
\$2.00 a year

Vol. 25—No. 1

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year

(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).

72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year

(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).

72-003 - Man-Hours and Hourly Earnings - Monthly - Price - \$4.00 per year

(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally-adjusted, for specific industries and regions; with annual totals for the last 12 years).

72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$3.00 per year

(Estimates of total numbers of Employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 - Seasonally-adjusted Employment Indexes - First Edition: January 1961 - March 1967 - Price \$2.00

(Monthly index numbers of employment, adjusted seasonally according to x-11 variant of the U.S. Bureau of the Census Method II, by industry division as well as most major industry group for Canada and by industry division for regions).

72-502 - Labour Income, 1926-58 - Price 75 cents - Out of print

(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-504 - Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics -- Historical Series, January 1961 - May 1965 -- Volume I - Price \$4.50

(This volume gives statistics revised to the 1960 Standard Industrial Classification and a 1961 time base for index numbers).

72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-506 - Labour Costs in Manufacturing, 1967 - Price \$1.50

72-510 - Labour Costs in Manufacturing, 1968 - Price \$1.50

(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employer labour costs, by industry group and area - Report prepared jointly by Labour Division of DBS and Economics and Research Branch of the Canada Department of Labour).

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

WAGES AND SALARIES IN MANUFACTURING

BASIS: 1960 STANDARD INDUSTRIAL CLASSIFICATION

ESTIMATES OF LABOUR INCOME

January 1971

The advance estimate of labour income for January, unadjusted for seasonal variations, was \$3,973.0 million, virtually unchanged from the preliminary estimate of \$3,970.6 million for December 1970. Seasonally-adjusted, total labour income increased from \$4,056.4 million in December to \$4,088.9 million in January, an increase of \$32.5 million or 0.8 per cent. In the goods-producing industries, wages and salaries advanced 1.1 per cent with manufacturing accounting for nearly all of this gain. The service-producing industries rose 0.5 per cent due mainly to increases in the service industry.

December 1970

The December estimate of labour income, seasonally-adjusted at \$4,056.4 million, advanced 0.9 per cent or \$34.7 million, over the revised estimate for November 1970. This was 0.5 percentage points higher than the increase recorded in November and above the average monthly gain recorded for the year. In the goods-producing industries, wages and salaries advanced 0.6 per cent. Manufacturing increased 1.0 per cent largely due to the settlement of the labour dispute in the transportation-equipment industries. If the effects of wages and salaries lost by employees on strike during November and December were removed, wages and salaries in manufacturing for December would have remained virtually unchanged. Mining increased 0.1 per cent while forestry recorded a 3.2 per cent decline and construction remained unchanged.

In the service-producing industries, wages and salaries increased by 1.0 per cent with all industry divisions except transportation, communication and other utilities, recording increases. Trade advanced 1.5 per cent as the 3.2 per cent increase in retail trade was partially offset by a 0.9 per cent decline in wholesale trade. Finance, insurance and real estate rose 1.6 per cent with increases in both earnings and employment. Transportation, communication and other utilities declined by 1.0 per cent. However, if the effects of retroactive payments paid to post office employees were removed from the November and December estimates, wages and salaries for this industry division in December would have shown an increase over November. Commercial service increased 1.4 per cent; non-commercial service advanced 0.9 per cent, due mainly to an increase in education. Public administration and defence rose 2.5 per cent with most of the increase being attributed to retroactive payments in the federal component.

(2) Includes Fishing and Trapping.

(3) Includes Yukon, North West Territories and Canadian residents abroad.

(4) The difference between the sum of the provinces and these totals, which include Yukon, North West Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry.

Note: Estimates may not add to totals, owing to rounding.

TABLE 2. Wages and Salaries by Industry, and Supplementary Labour Income, Canada, Adjusted for Seasonal Variation

Year and month	Wages and Salaries												
	Agri- culture	Forestry	Mining	Manu- fac- turing	Con- struc- tion	Trans- porta- tion, communi- cation and utilities	Trade	Finance, insur- ance and real estate	Service	Public Admin. and Defence (1)	Total wages and salaries (2)	Supple- mentary labour income	Total labour income (2)

Concepts and Methods

Labour income is the compensation paid to employees for services rendered either as wages and salaries or as supplementary labour income. Wages and salaries include directors' fees, bonuses, commissions, taxable allowance and benefits, some imputed earnings (e.g. those for persons in religious orders) and living allowances considered to be an additional benefit to the employee. Supplementary labour income, which consists of payments made by employers for the future benefit of employees, is composed of employers' contributions to employee welfare and pension funds, to the Workmen's Compensation Fund and to the Unemployment Insurance Fund.

Money payments or payments in kind made to, or on behalf of, residents of Canada, excluding military pay and allowances, are included in the wages and salaries component. Contributions to armed forces pension funds are included in the supplementary labour income component in the estimates based on the 1948 Standard Industrial Classification. These contributions are totally excluded from the revised estimates for 1951 to date, based on the 1960 Standard Industrial Classification.

The annual estimates are based in most cases on data derived from sample and full coverage surveys conducted within the Dominion Bureau of Statistics, the decennial population censuses, and the public accounts of the federal and provincial governments.

The main indicators used to interpolate between censuses, project from benchmarks and allocate annual figures by month have been: a) the payroll index derived from the Employment, Payrolls and Man-Hours survey of large firms, b) total employees as published in Estimates of Employees by Province and Industry combined with average weekly earnings of large firms and c) monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments.

The monthly figures are not affected by the number of pay days per month because a constant number of working days is assumed for each month. Retroactive wage payments reported for 1951-1968 were distributed over the year but since 1969 these payments have been included in the months in which they were made.

A complete explanation of the sources and methods used as well as definitions and other related information will be published at a later date.

Statistical Presentation

The latest monthly figures are advance estimates based on early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented with one digit after the decimal point, i.e. to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published for 1926 to 1969. Those based on the 1960 Standard Industrial Classification are now available from 1951 to date. A complete historical record of the statistics published is obtainable as follows:

Estimates Based on the 1948 Standard Industrial Classification

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year

(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).

72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year

(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).

72-003 - Man-Hours and Hourly Earnings - Monthly - Price - \$4.00 per year

(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally-adjusted, for specific industries and regions; with annual totals for the last 12 years).

72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$3.00 per year

(Estimates of total numbers of Employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 - Seasonally-adjusted Employment Indexes - First Edition: January 1961 - March 1967 - Price \$2.00

(Monthly index numbers of employment, adjusted seasonally according to x-11 variant of the U.S. Bureau of the Census Method II, by industry division as well as most major industry group for Canada and by industry division for regions).

72-502 - Labour Income, 1926-58 - Price 75 cents - Out of print

(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-504 - Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics -- Historical Series, January 1961 - May 1965 -- Volume I - Price \$4.50

(This volume gives statistics revised to the 1960 Standard Industrial Classification and a 1961 time base for index numbers).

72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-506 - Labour Costs in Manufacturing, 1967 - Price \$1.50

72-510 - Labour Costs in Manufacturing, 1968 - Price \$1.50

(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employer labour costs, by industry group and area - Report prepared jointly by Labour Division of DBS and Economics and Research Branch of the Canada Department of Labour).

Remittances should be in the form of cheque or money order,
made payable to the Receiver General of Canada and forwarded to
the Publications Distribution Unit, Financial Control Section,
Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa,
Canada.

WAGES AND SALARIES IN MANUFACTURING

BASIS: 1960 STANDARD INDUSTRIAL CLASSIFICATION

ESTIMATES OF LABOUR INCOME

Second quarter 1971

During the second quarter, total labour income, adjusted for seasonal fluctuations, advanced 3.2 per cent. This compares with an increase of 1.9 per cent recorded in the first quarter and an average quarterly gain of about 2.0 per cent for 1970.

Wages and salaries in the goods-producing industries advanced 2.9 per cent as compared with a gain of 2.2 per cent in the first quarter. In the service-producing industries, wages and salaries rose 3.5 per cent. This increase is 1.8 percentage points higher than that recorded in the first quarter and accounts for about two-thirds of the total second quarter growth in wages and salaries.

Manufacturing, construction, service, and public administration and defence accounted for about seventy-five per cent of the total second quarter gain. Manufacturing rose 2.4 per cent, while construction advanced 4.3 per cent after recording a 0.7 per cent increase in the first quarter. Most of the gain in service (3.8 per cent) was the result of an acceleration in the non-commercial sector as the commercial sector increased at about the same rate as in the first quarter. Retroactive payments in the second quarter accounted for about three-quarters of the 7.2 per cent increase in public administration and defence. If the effect of retroactive payments were removed from the first and second quarter estimates, the gain in the second quarter would be slightly less than that of the first quarter. Transportation, storage, communication, and other utilities advanced 1.9 per cent. Trade rose 2.3 per cent with wholesale and retail trade recording gains of 1.3 per cent and 2.9 per cent respectively. Finance increased 2.8 per cent at about the same rate as was recorded in the first quarter. The primary industries advanced 3.3 per cent with gains of 9.8 per cent and 2.0 per cent in forestry and mining respectively.

(1) Excludes Military Pay and Allowances.

(2) Includes Fishing and Trapping.

(3) Includes Yukon, North West Territories and Canadian residents abroad.

(4) The difference between the sum of the provinces and these totals, which include Yukon, North West Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry.

Note: Estimates may not add to totals, owing to rounding.

Concepts and Methods

Labour income is the compensation paid to employees for services rendered either as wages and salaries or as supplementary labour income. Wages and salaries include directors' fees, bonuses, commissions, taxable allowance and benefits, some imputed earnings (e.g. those for persons in religious orders) and living allowances considered to be an additional benefit to the employee. Supplementary labour income, which consists of payments made by employers for the future benefit of employees, is composed of employers' contributions to employee welfare and pension funds, to the Workmen's Compensation Fund and to the Unemployment Insurance Fund.

Money payments or payments in kind made to, or on behalf of, residents of Canada, excluding military pay and allowances, are included in the wages and salaries component. Contributions to armed forces pension funds are included in the supplementary labour income component in the estimates based on the 1948 Standard Industrial Classification. These contributions are totally excluded from the revised estimates for 1951 to date, based on the 1960 Standard Industrial Classification.

The annual estimates are based in most cases on data derived from sample and full coverage surveys conducted within the Dominion Bureau of Statistics, the decennial population censuses, and the public accounts of the federal and provincial governments.

The main indicators used to interpolate between censuses, project from benchmarks and allocate annual figures by month have been: a) the payroll index derived from the Employment, Payrolls and Man-Hours survey of large firms, b) total employees as published in Estimates of Employees by Province and Industry combined with average weekly earnings of large firms and c) monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments.

The monthly figures are not affected by the number of pay days per month because a constant number of working days is assumed for each month. Retroactive wage payments reported for 1951-1968 were distributed over the year but since 1969 these payments have been included in the months in which they were made.

A complete explanation of the sources and methods used as well as definitions and other related information will be published at a later date.

Statistical Presentation

The latest monthly figures are advance estimates based on early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented with one digit after the decimal point, i.e. to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published for 1926 to 1969. Those based on the 1960 Standard Industrial Classification are now available from 1951 to date. A complete historical record of the statistics published is obtainable as follows:

Estimates Based on the 1948 Standard Industrial Classification

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year

(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).

72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year

(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).

72-003 - Man-Hours and Hourly Earnings - Monthly - Price - \$4.00 per year

(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally-adjusted, for specific industries and regions; with annual totals for the last 12 years).

72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$3.00 per year

(Estimates of total numbers of Employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 - Seasonally-adjusted Employment Indexes - First Edition: January 1961 - March 1967 - Price \$2.00

(Monthly index numbers of employment, adjusted seasonally according to x-11 variant of the U.S. Bureau of the Census Method II, by industry division as well as most major industry group for Canada and by industry division for regions).

72-502 - Labour Income, 1926-58 - Price 75 cents - Out of print

(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-504 - Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics -- Historical Series, January 1961 - May 1965 -- Volume I - Price \$4.50

(This volume gives statistics revised to the 1960 Standard Industrial Classification and a 1961 time base for index numbers).

72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-506 - Labour Costs in Manufacturing, 1967 - Price \$1.50

72-510 - Labour Costs in Manufacturing, 1968 - Price \$1.50

(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employer labour costs, by industry group and area - Report prepared jointly by Labour Division of DBS and Economics and Research Branch of the Canada Department of Labour).

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

The interpretation of the symbols used in the tables throughout this publication is as follows:

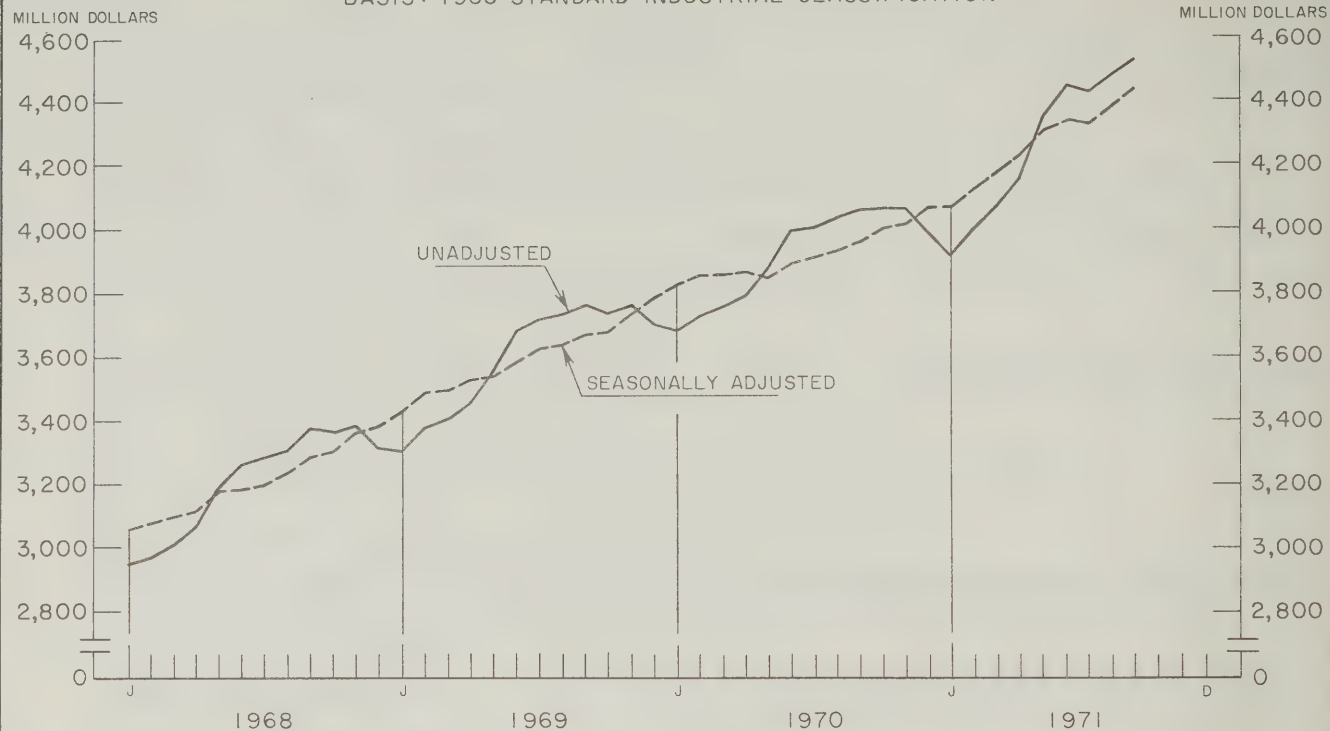

r Revised figures.

P Preliminary figures.

a Advance figures.

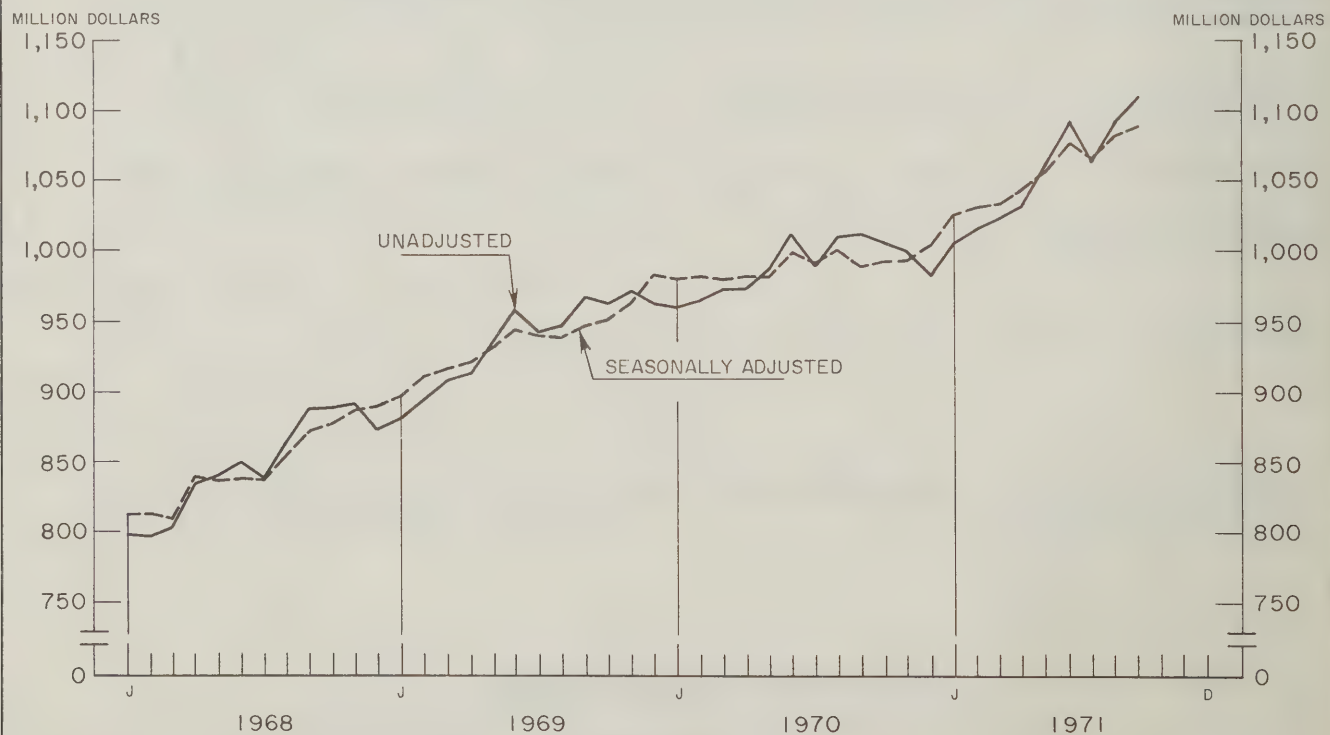

WAGES, SALARIES AND SUPPLEMENTARY LABOUR INCOME

BASIS: 1960 STANDARD INDUSTRIAL CLASSIFICATION

WAGES AND SALARIES IN MANUFACTURING

BASIS: 1960 STANDARD INDUSTRIAL CLASSIFICATION

ESTIMATES OF LABOUR INCOME

Total labour income seasonally-adjusted was estimated at \$4,335.6 million in June, \$4,328.4 million in July, \$4,384.6 million in August and \$4,433.0 in September. The estimates for June, July, August and September were 11.3, 10.9, 11.3 and 11.9% higher than those for the same months of 1970 respectively.

During the third quarter, total labour income seasonally-adjusted increased by 2.1%. This compares with increases of 2.4% in the first quarter and 4.0% in the second quarter. The second quarter growth was somewhat inflated by large retroactive payments. The deceleration in the third quarter occurred in both the goods and service producing industries.

Wages and salaries in the goods-producing industries advanced 1.4%, 2.2 percentage points less than that recorded in the second quarter. Most of this deceleration was recorded in construction and manufacturing. Construction, after recording a 5.8% increase in the second quarter, declined by 0.5%. Part of this deceleration can be attributed to labour disputes in the third quarter. In manufacturing wages and salaries advanced by 1.9%, 0.9 percentage points less than that recorded in the second quarter. The service-producing industries increased by 2.5% as compared with 4.4% in the second quarter. The second quarter increase reflected large retroactive payments made in public administration. If the effect of these retroactive payments were removed from the second and third quarter estimates, the quarterly gains would have been 3.8% and 3.1% respectively. All industry divisions contributed to the deceleration except transportation, communication and other utilities which showed about the same growth in both quarters.

(1) Excludes Military Pay and Allowances.

(2) Includes Fishing and Trapping.

(3) Includes Yukon, North West Territories and Canadian residents abroad.

(4) The difference between the sum of the provinces and these totals, which include Yukon, North West Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry.

Note: Estimates may not add to totals, owing to rounding.

Concepts and Methods

Labour income is the compensation paid to employees for services rendered either as wages and salaries or as supplementary labour income. Wages and salaries include directors' fees, bonuses, commissions, taxable allowance and benefits, some imputed earnings (e.g. those for persons in religious orders) and living allowances considered to be an additional benefit to the employee. Supplementary labour income, which consists of payments made by employers for the future benefit of employees, is composed of employers' contributions to employee welfare and pension funds, to the Workmen's Compensation Fund and to the Unemployment Insurance Fund.

Money payments or payments in kind made to, or on behalf of, residents of Canada, excluding military pay and allowances, are included in the wages and salaries component. Contributions to armed forces pension funds are included in the supplementary labour income component in the estimates based on the 1948 Standard Industrial Classification. These contributions are totally excluded from the revised estimates for 1951 to date, based on the 1960 Standard Industrial Classification.

The annual estimates are based in most cases on data derived from sample and full coverage surveys conducted within the Dominion Bureau of Statistics, the decennial population censuses, and the public accounts of the federal and provincial governments.

The main indicators used to interpolate between censuses, project from benchmarks and allocate annual figures by month have been: a) the payroll index derived from the Employment, Payrolls and Man-Hours survey of large firms, b) total employees as published in Estimates of Employees by Province and Industry combined with average weekly earnings of large firms and c) monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments.

The monthly figures are not affected by the number of pay days per month because a constant number of working days is assumed for each month. Retroactive wage payments reported for 1951-1968 were distributed over the year but since 1969 these payments have been included in the months in which they were made.

A complete explanation of the sources and methods used as well as definitions and other related information will be published at a later date.

Statistical Presentation

The latest monthly figures are advance estimates based on early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented with one digit after the decimal point, i.e. to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published for 1926 to 1969. Those based on the 1960 Standard Industrial Classification are now available from 1951 to date. A complete historical record of the statistics published is obtainable as follows:

Estimates Based on the 1948 Standard Industrial Classification

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

- 72-001 - Advance Statement on Employment and Average Weekly Wages and Salaries - Monthly - Price \$1.00 per year
(Index numbers of employment and averages of weekly wage and salary statistics for Canada (major industry divisions) and the provinces (industrial composite figures)).
- 72-002 - Employment and Average Weekly Wages and Salaries - Monthly - Price \$4.00 per year
(Industry and area index numbers of employment and payrolls and averages of weekly wage and salary statistics; comparisons with earlier periods; charts and explanatory material).
- 72-003 - Man-Hours and Hourly Earnings - Monthly - Price - \$4.00 per year
(Industry and area averages of hours per week, hourly and weekly wages, with comparisons from a month and a year earlier, and certain historical comparisons; charts and explanatory material).
- 72-005 - Estimates of Labour Income - Monthly - Price \$2.00 per year
(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally-adjusted, for specific industries and regions; with annual totals for the last 12 years).
- 72-008 - Estimates of Employees by Province and Industry - Monthly - Price \$3.00 per year
(Estimates of total numbers of Employees, with comparisons with a month and a year earlier).
- 72-201 - Review of Employment and Average Weekly Wages and Salaries - Annual - Price \$1.50
(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-202 - Review of Man-Hours and Hourly Earnings - Annual - Price \$1.50
(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).
- 72-204 - Earnings and Hours of Work in Manufacturing - Annual - Final Report - Price 75 cents
(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).
- 72-206 - Seasonally-adjusted Employment Indexes - First Edition: January 1961 - March 1967 - Price \$2.00
(Monthly index numbers of employment, adjusted seasonally according to x-11 variant of the U.S. Bureau of the Census Method II, by industry division as well as most major industry group for Canada and by industry division for regions).
- 72-502 - Labour Income, 1926-58 - Price 75 cents - Out of print
(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).
- 72-504 - Employment Indexes, Average Weekly Wages and Salaries, Average Weekly Hours and Average Hourly Earnings, Monthly and Annual Statistics -- Historical Series, January 1961 - May 1965 -- Volume I - Price \$4.50
(This volume gives statistics revised to the 1960 Standard Industrial Classification and a 1961 time base for index numbers).
- 72-508 - Estimates of Employees by Province and Industry, 1961-68 - Price 50 cents
(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).
- 72-506 - Labour Costs in Manufacturing, 1967 - Price \$1.50
- 72-510 - Labour Costs in Manufacturing, 1968 - Price \$1.50
(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employer labour costs, by industry group and area - Report prepared jointly by Labour Division of DBS and Economics and Research Branch of the Canada Department of Labour).

Remittances should be in the form of cheque or money order, made payable to the Receiver General of Canada and forwarded to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, or to the Queen's Printer, Ottawa, Canada.

WAGES, SALARIES AND SUPPLEMENTARY LABOUR INCOME

BASIS: 1960 STANDARD INDUSTRIAL CLASSIFICATION

WAGES AND SALARIES IN MANUFACTURING

BASIS: 1960 STANDARD INDUSTRIAL CLASSIFICATION

ESTIMATES OF LABOUR INCOME

(Adjusted for Seasonal Variations)

Early in 1971, difficulties in implementing a new computerized system for compiling employment, earnings and hours data resulted in the interruption of the publication of these data. As a result, monthly estimates of labour income, which largely depend on the above-noted data for projection purposes, were published at infrequent intervals, i.e. February to June data were released in September, July to September were published in December and the estimates for October to December are contained in this publication. It is now expected that the January to March, 1972 estimates of labour income will be published sometime in May 1972 following which monthly publication will be resumed.

Fourth Quarter 1971

During the fourth quarter, total labour income, adjusted for seasonal variations, increased by 2.0 %. This gain was about the same as that recorded in the third quarter but represented a marked deceleration from the advances of 2.4 and 4.0 % experienced in the first and second quarters of 1971, respectively. The gain in the fourth quarter was almost entirely due to increases in average earnings, with employment recording little change.

In the goods-producing industries, wages and salaries rose by 1.2 %. Since the first quarter of 1971, the relative contribution of the goods-producing industries to the growth in total labour income has been declining. The growth in the fourth quarter was only slightly less than the increase recorded in the third quarter, but represented a considerable deceleration from the gains of 3.1 and 3.6 % recorded in the first and second quarters, respectively. This deceleration was mainly the result of a slower growth and a decline in employment during the third and fourth quarters, respectively, following significant gains in the first half of the year. The increase in employment at the beginning of 1971 was partly attributable to the cessation of labour disputes in manufacturing and construction in the latter half of 1970. Manufacturing accounted for most of this deceleration by recording an increase of only 0.8 % as compared with gains of 3.4, 2.8, and 2.1 % in the first, second, and third quarters, respectively. Construction increased by 3.0 % over the strike-affected third quarter which recorded virtually no change. Wages and salaries in the primary industries remained virtually unchanged with a decrease in mining being offset by increases in the other components.

In the service-producing industries, wages and salaries increased by 2.6 % with most of the gain being attributable to increases in average earnings. This gain was about 0.5 percentage points more than the advance in the third quarter and was about the same as the average quarterly growth recorded in 1971. The most noticeable advance was a 5.0 % increase in total trade. This gain was about twice as large as the average quarterly growth for 1971. Both retail and wholesale trade contributed to this increase. Transportation, communication, and other utilities increased by 2.1 %, a marked deceleration from the gains of about 3.5 % in the second and third quarters but only slightly less than the average quarterly gain for 1971. The deceleration in the fourth quarter was due to a slowdown in average earnings as employment increased. Finance, insurance, and real estate advanced by 1.7 %, slightly less than the average quarterly gain in 1971 but 0.7 percentage points more than the increase recorded in the third quarter. In service, wages and salaries increased by 1.3 %. This compares with an increase of 2.5 % in the third quarter and an average quarterly gain for 1971 of 2.8 %. Both the commercial and non-commercial sectors of service contributed to this deceleration. Public administration and defence advanced by 4.7 %, about one percentage point more than the average quarterly gain for 1971. Retro-active payments to federal government employees accounted for a large proportion of this fourth quarter gain.

Annual 1971

During 1971, total labour income increased by 9.9 % as compared with increases of 8.9 % in 1970 and 12.2 % in 1969. The larger rate of growth in 1971 resulted from acceleration in both employment and average earnings but, as in 1970, the increase in average earnings contributed most to the total advance of 9.9 %. While both the goods-producing and service-producing industries advanced at a faster rate than in 1970 the acceleration was greater in the goods-producing industries.

Wages and salaries in the goods-producing industries increased by 8.5 %, entirely as a result of increases in average earnings, as employment declined. This increase was 1.7 percentage points more than the advance recorded in 1970 and except for 1969, constituted the largest gain since 1966. In manufacturing and construction, which were affected by strikes to a larger degree in 1970 than in 1971, wages and salaries increased by 7.5 % and 13.4 %, respectively. These gains compare with 1970 advances of 5.6 % in manufacturing and 9.6 % in construction. Mining increased by 6.8 % following increases of 17.5 % in 1970 and 4.4 % in 1969. While only a relatively small amount of wages and salaries were lost by employees on strikes in 1970, labour disputes affected this industry significantly in 1969 and moderately in 1971. Forestry advanced by 6.0 % (no change in 1970) and agriculture, fishing and trapping increased by 4.5 %, about the same gain as for the previous year.

Wages and salaries in the service-producing industries increased by 10.9 % as compared with gains of 10.2 and 14.2 % recorded in 1970 and 1969, respectively. Employment advanced at about the same rate as in 1970 while average earnings accelerated slightly. Wages and salaries in service increased by 11.8 % (12.7 % in 1970) with larger gains recorded in the commercial sector than in the non-commercial sector. Transportation, communication and other utilities advanced by 9.8 % (7.7 % in 1970), trade by 8.6 % (9.3 % in 1970), finance, insurance and real estate by 8.8 % (9.6 per cent in 1970), and public administration by 15.0 % (8.6 % in 1970). The gain in public administration was somewhat influenced by larger retroactive payments made to federal government employees in 1971 than in 1970.

(1) Excludes Military Pay and Allowances.

(2) Includes Fishing and Trapping.

(3) Includes Yukon, North West Territories and Canadian residents abroad.

(4) The difference between the sum of the provinces and these totals, which include Yukon, North West Territories and Canadian residents abroad, contains a residual error resulting from seasonally adjusting by province and by industry.

Note: Estimates may not add to totals, owing to rounding.

TABLE 2. Wages and Salaries by Industry, and Supplementary Labour Income, Canada, Adjusted for Seasonal Variation

Year and month	Wages and Salaries												
	Agri- culture	Forestry	Mining	Manu- fac- turing	Con- struc- tion	Trans- porta- tion, communi- cation and other utilities	Trade	Finance, insur- ance and real estate	Service	Public Admin. and Defence(1)	Total wages and salaries (2)	Supple- mentary labour income	Total labour income(2)
	millions of dollars

Concepts and Methods

Labour income is the compensation paid to employees for services rendered either as wages and salaries or as supplementary labour income. Wages and salaries include directors' fees, bonuses, commissions, taxable allowance and benefits, some imputed earnings (e.g. those for persons in religious orders) and living allowances considered to be an additional benefit to the employee. Supplementary labour income, which consists of payments made by employers for the future benefit of employees, is composed of employers' contributions to employee welfare and pension funds, to the Workmen's Compensation Fund and to the Unemployment Insurance Fund.

Money payments or payments in kind made to, or on behalf of, residents of Canada, excluding military pay and allowances, are included in the wages and salaries component. Contributions to armed forces pension funds are included in the supplementary labour income component in the estimates based on the 1948 Standard Industrial Classification. These contributions are totally excluded from the revised estimates for 1951 to date, based on the 1960 Standard Industrial Classification.

The annual estimates are based in most cases on data derived from sample and full coverage surveys conducted within the Dominion Bureau of Statistics, the decennial population censuses, and the public accounts of the federal and provincial governments.

The main indicators used to interpolate between censuses, project from benchmarks and allocate annual figures by month have been: a) the payroll index derived from the Employment, Payrolls and Man-Hours survey of large firms, b) total employees as published in Estimates of Employees by Province and Industry combined with average weekly earnings of large firms and c) monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments.

The monthly figures are not affected by the number of pay days per month because a constant number of working days is assumed for each month. Retroactive wage payments reported for 1951-1968 were distributed over the year but since 1969 these payments have been included in the months in which they were made.

A complete explanation of the sources and methods used as well as definitions and other related information will be published at a later date.

Statistical Presentation

The latest monthly figures are advance estimates based on early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented with one digit after the decimal point, i.e. to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published for 1926 to 1969. Those based on the 1960 Standard Industrial Classification are now available from 1951 to date. A complete historical record of the statistics published is obtainable as follows:

ESTIMATES OF LABOUR INCOME

Total labour income (unadjusted for seasonality) was estimated at \$4,417.7 million in January, \$4,445.9 million in February and \$4,531.3 million in March. These estimates were 12.3, 11.8, and 12.0 % higher than those for the same months of 1971, respectively.

During the first quarter of 1972, total labour income seasonally-adjusted advanced by 3.1 %, a marked acceleration from the gains of about 2 % recorded in the third and fourth quarters of 1971. Wages and salaries increased by 2.8 % as a result of gains in both employment and average earnings. The gain in supplementary labour income (8.7 %) was magnified owing to the increased coverage of and the larger employer contributions to the Unemployment Insurance Fund commencing January 1972.

Wages and salaries (seasonally-adjusted) in the goods-producing industries advanced by 1.7 % as compared with a gain of 1.2 % in the fourth quarter. Most of this growth came from manufacturing where wages and salaries rose 2.2 % (1.3 % in the fourth quarter). After recording declines in the latter half of 1971, employment in this industry increased by about 0.5 % in the first quarter of 1972. Construction increased by 1.2 % while the primary industries declined by 0.1 %.

The service-producing industries, which accounted for over 75 % of the total gain in wages and salaries, increased by 3.5 %. This compares with gains of 2.3 and 2.8 % in the third and fourth quarters of 1971. Gains in employment were recorded in each industry division within this group. The increases recorded in wages and salaries were higher than the average gains of the previous two quarters in all industry divisions except trade. Transportation, communication and other utilities increased by 3.9 %, finance, insurance and real estate by 4.5 %, service by 3.0 %, public administration by 5.2 % and trade by 2.4 %.

ESTIMATIONS DU REVENU DU TRAVAIL

Le montant total du revenu du travail (chiffres non désaisonnalisés) a été estimé à 4,417.7 millions de dollars en janvier, à 4,445.9 millions en février et à 4,531.3 millions en mars. Ces estimations sont de 12.3 %, 11.8 % et 12.0 % plus élevées que celles des mois correspondants de 1971.

Au cours du premier trimestre de 1972, le revenu total du travail (chiffre désaisonné) s'est accru de 3.1 %, soit une accélération marquée en comparaison des gains d'environ 2 % enregistrés au cours des troisième et quatrième trimestres de 1971. Les salaires se sont accrus de 2.8 % en raison d'une augmentation des effectifs et des gains moyens. L'accroissement du revenu supplémentaire du travail (8.7 %) a été plus considérable à cause de l'élargissement du champ d'application du régime d'assurance-chômage et de l'augmentation des contributions patronales à la Caisse d'assurance-chômage depuis janvier 1972.

Les salaires (chiffres désaisonnalisés) dans les industries de biens ont augmenté de 1.7 % comparativement à 1.2 % au quatrième trimestre. La majeure partie de cet accroissement provient des industries manufacturières, où les salaires se sont élevés de 2.2 % (1.3 % pendant le quatrième trimestre). Après avoir enregistré des baisses dans la seconde moitié de 1971, cette branche d'activité a accru son niveau d'emploi d'environ 0.5 % au cours du premier trimestre de 1972. La branche du bâtiment et des travaux publics a affiché une augmentation de 1.2 %, tandis que celle des industries primaires a accusé une diminution de 0.1 %.

Les industries de services, qui sont intervenus pour plus de 75 % de l'accroissement global des salaires, ont enregistré un accroissement de 3.5 % comparativement à 2.3 % et 2.8 % pour les troisième et quatrième trimestres de 1971. Le niveau de l'emploi a progressé dans toutes les branches d'activité appartenant à ce groupe. Dans toutes les branches d'activité, à l'exception du commerce, l'augmentation des salaires a été plus élevée que la progression moyenne des deux trimestres précédents. L'augmentation a été de 3.9 % dans les transports, les communications et les autres services publics, de 4.5 % dans les finances, les assurances et les affaires immobilières, de 3.0 % dans les services, de 5.2 % dans l'administration publique, et de 2.4 % dans le commerce.

CONCEPTS AND METHODS

Labour Income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms(1).
- (b) Total employees as published in Estimates of Employees by Province and Industry, Catalogue No. 72-008, combined with average weekly earnings data based on large firms(1) only.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments(2).

Separate monthly estimates of wages and salaries are prepared for each province for eighteen industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate 1971 data and to project from November 1971 to obtain 1972 data, are shown below for the eighteen groups for which separate provincial estimates are prepared:

CONCEPTS ET MÉTHODES

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste des rémunérations totales définies plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- (a) Indice de la rémunération dans les grandes entreprises(1).
- (b) Total des salariés, tiré de "Estimations du nombre d'employés par province et par industrie (n° 72-008 au catalogue), avec les gains hebdomadaires moyens dans les grandes entreprises(1) seulement.
- (c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des rémunérations pour chaque province pour dix-huit branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de 1971 et à projeter les données de 1972 à partir des estimations de novembre 1971 figurent ci-dessous pour les dix-huit branches pour lesquelles il est établi des estimations au niveau provincial:

<p>Industry Groups — Branches d'activité économique</p>	<p>Projectors — Projecteurs</p>	<p>Weights — 1971 Total Wages and salaries equal 100 % — Poids — Rémunérations totales 1971 = 100 %</p>
1. Agriculture.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing — Pêche.	Value of fish caught and landed as published in Fisheries Statistics Cat. No. 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Cat. No. 23-207. — Valeur des poissons pris et débarqués, selon "La statistique mensuelle des pêches du Canada", n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication "Production de fourrures", n° 23-207 au catalogue.	0.1
3. Hunting and trapping — Chasse et piégeage.		
4. Forestry — Forêts.		1.1
5. Mining — Mines.		2.5
6. Manufacturing — Industries manufacturières.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of Employment Earnings and Hours, Cat. No. 72-002. — Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication "Emploi, gains et heures de travail" n° 72-002 au catalogue.	26.0
7. Construction.		8.0
8. Transportation, communication and other utilities — Transports, communications et autres services publics.		11.0
9. Trade — Commerce.		13.5
10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.		5.3
11. Commercial services — Services commerciaux.		7.7
12. Education — Enseignement.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Cat. No. 72-008, combined with a 3-month moving average of average earnings in large firms(1) for the industrial composite. — Nombre de salariés calculé pour la publication "Estimations du nombre d'employés par province et par industrie", n° 72-008 au catalogue, et moyenne mobile sur trois mois des gains moyens dans les grandes entreprises(1), pour l'ensemble des branches.	9.5
13. Hospitals and Welfare organizations — Hôpitaux et services sociaux.		5.2
14. Religious organizations and private households — Organisations culturelles et ménages privés.		1.2
15. Federal administration — Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Cat. No. 72-004 — Rémunérations fondées sur les données établies pour "L'emploi dans l'administration fédérale", n° 72-004 au catalogue.	3.7
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Cat. No. 72-007. — Rémunérations fondées sur les données établies pour "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue.	2.2
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment Cat. No. 72-009. — Rémunérations fondées sur les données établies pour "L'emploi dans les administrations locales", n° 72-009 au catalogue.	2.1
18. Other government offices — Autres services gouvernementaux.	Projected on the same basis as federal administration. — Projections sur la même base que pour l'administration fédérale.	0.1

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used (i.e. the provincial payroll indexes by industry of large firms⁽¹⁾) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Employment Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

This publication contains revised estimates as follows:

- (a) final annual estimates by industry for the provinces and for Manufacturing from 1947 to 1968
- (b) preliminary annual estimates by industry for the provinces and for Manufacturing from 1969 to 1971, and
- (c) monthly estimates for preliminary data by industry, adjusted and not adjusted for seasonal variations, from January 1970 to March 1972. (Final monthly estimates for the period 1947-1968 and preliminary figures for 1969 are available on request from the Employment Section, Statistics Canada.)

Monthly estimates for the provinces and for manufacturing by province will not be available before November 1972.

- (1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period.

Les estimations mensuelles des rémunérations sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés (c.-à-d. les indices de rémunération par province et par branche pour les grandes entreprises) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrables et (ou) de jours de paye pendant le mois.

Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la "Standard Industrial Classification" de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

La présente publication renferme les estimations rectifiées suivantes:

- (a) estimations annuelles finales, par branche d'activité économique, par province et pour les industries manufacturières de 1947 à 1968
- (b) estimations annuelles provisoires par branche d'activité économique, par province et pour les industries manufacturières de 1969 à 1971 et
- (c) estimations mensuelles provisoires par branche d'activité économique, désaisonnalisées et brutes, de janvier 1970 à mars 1972. (Ces estimations mensuelles finales pour la période 1947-1968 et les chiffres provisoires pour 1969 sont disponibles sur demande à la Section de l'emploi de Statistique Canada.)

Les estimations mensuelles par province et pour les industries manufacturières par province ne seront pas disponibles avant novembre 1972.

- (1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins vingt personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période.

Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment Earnings and Hours, Cat. No. 72-002.

- (2) The results of these surveys are published in Federal Government Employment, Cat. No. 72-004, Provincial Government Employment, Cat. No. 72-007 and Local Government Employment, Cat. No. 72-009.

On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de "Employment, Earnings and Hours", n° 72-002 au catalogue.

- (2) Les résultats de ces enquêtes sont publiés dans "L'emploi dans l'administration fédérale", n° 72-004 au catalogue, "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue, et "L'emploi dans les administrations locales", n° 72-009 au catalogue.

PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

72-002 - Employment, Earnings and Hours, M. Angl.

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

72-005 - Estimations du Revenu du Travail; M. Bil.

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

72-008 - Estimations du nombre d'employés par province et par industrie, M. Bil.

(Estimations du nombre total d'employés; comparaisons avec les chiffres correspondants du mois précédent et de l'année précédente).

72-201 - Review of Employment and Average Weekly Wages and Salaries, A. Angl.

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: indices mensuels et annuels, pour une longue période; graphiques et notes explicatives).

72-202 - Review of Man-Hours and Hourly Earnings, A. Angl.

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région, données mensuelles et annuelles, pour une longue période; graphiques et notes explicatives).

72-204 - Earnings and Hours of Work in Manufacturing, 1969, Angl.

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, ouvriers et salariés, pour une semaine d'octobre, à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

72-206 - Indices de l'emploi désaisonnalisés. Janvier 1961 à décembre 1970, Bil.

(Indices de l'emploi, par activité économique et par région: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés et moyennes mobiles MDC; heures hebdomadaires moyennes et gains horaires moyens).

72-502 - Labour Income, 1926-1958 - épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

72-508 - Estimations du nombre d'employés par province et par industrie, 1961-1968, Bil.

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

72-510 - Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Bil.

72-511 - Coûts de la main-d'oeuvre au Canada-Mines, carrières et puits de pétrole, 1969, Bil.

(Publication annuelle couvrant diverses branches d'activité sur une base cyclique ou irrégulière. Estimations de certains coûts de main-d'oeuvre, par groupe d'activité économique et par région - Publication conjointe de la Division du travail de Statistique Canada et de la Direction de l'économie et des recherches du ministère du Travail du Canada).

72-601 - Gains et heures de travail au Canada - Commerce de détail, septembre 1970, Bil.

(Gains hebdomadaires moyens, gains horaires moyens et heures hebdomadaires moyennes des employés des deux sexes dans le commerce de détail, selon la situation, ("à plein temps", "à temps partiel et occasionnels" et rattachés au "siège social", pour le Canada, les provinces et certaines régions urbaines).

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et social du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 - Employment, Earnings and Hours, M., Engl.

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income, M. Bil.

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 - Estimates of Employees by Province and Industry, M. Bil.

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries, A. Engl.

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings, A. Engl.

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing, 1969 Engl.

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 - Seasonally-adjusted Employment Indexes, January 1961 - December 1970, Bil.

(Industry and area index numbers of employment: unadjusted, final seasonal factors, seasonally-adjusted and MCD moving average; average weekly hours and hourly earnings).

72-502 - Labour Income, 1926-58 - Out of print, Engl.

(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-508 - Estimates of Employees by Province and Industry, 1961-68, Bil.

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 - Labour Costs in Manufacturing 1968, Bil.

72-511 - Labour Costs in Canada, Mines, Quarries and Oil Wells 1969, Bil.

(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employer Labour Costs, by industry group and area - Report prepared jointly by Labour Division of Statistics Canada and Economics and Research Branch of Labour Canada).

72-601 - Earnings and Hours of Work in Canada - Retail Trade Industry, September 1970, Bil.

(Average Weekly Earnings, Average Hourly Earnings and Average Weekly Hours of Male and Female Employees in Retail Trade, by Employee Status i.e. "full-time", "part-time and casual" and "head office" employees for Canada, provinces and selected urban areas).

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

ESTIMATES OF LABOUR INCOME

(Adjusted for Seasonal Variations)

Third Quarter 1972

During the third quarter of 1972, total labour income advanced by 2.2 % as compared with 2.0 % in the second quarter. Industrial disputes had a much larger impact on the second quarter estimates of labour income than on the third quarter estimates. If the effects of wages and salaries lost by employees on strike were removed from the estimates, labour income would show a deceleration in the third quarter.

The gain of 2.5 % in wages and salaries in the goods-producing industries was the same as that recorded in the second quarter. Within this group, manufacturing advanced by 1.9 %. This was 1.7 percentage points less than the gain recorded in the second quarter but about the same as the average quarterly gains of 1971. Forestry and Construction, which were affected by labour disputes to a more significant degree in the second quarter than in the third quarter, increased by 4.6 and 5.0 % respectively. The decline of 0.2 % in mining reflected partly the effects of wages and salaries lost by employees on strike during the third quarter.

The service-producing industries advanced by 2.2 % as compared with 1.7 % in the second quarter. This acceleration can be attributed to gains of 3.3 % in service (1.7 % in the second quarter) and 3.5 % in public administration (-1.2 % in the second quarter) following the return to work of employees on strike in Quebec during the second quarter. The decline of 1.4 % in transportation, communication and other utilities reflected partly the effects of labour disputes in Ontario during the third quarter. The gain of 2.4 % in trade was 1.7 percentage points less than the advance recorded in the second quarter and about 0.8 percentage points less than the average quarterly gain of the last four quarters. Finance decelerated slightly from a gain of 2.1 % in the second quarter to 1.9 % in the third quarter.

ESTIMATIONS DU REVENU DU TRAVAIL

(Chiffres désaisonnalisés)

Troisième trimestre de 1972

Au cours du troisième trimestre de 1972, le revenu total du travail, qui avait augmenté de 2.0 % au deuxième trimestre, a progressé de 2.2 %. Les conflits de travail ont eu des répercussions beaucoup plus grandes sur les estimations du revenu du travail du deuxième trimestre que sur les estimations du troisième trimestre. Si on faisait abstraction des effets des rémunérations perdues par les grévistes sur les estimations, on constaterait que le revenu du travail a dégressé au cours du troisième trimestre.

L'augmentation de 2.5 % des rémunérations dans les industries productrices de biens a été la même que celle du deuxième trimestre. Dans ce groupe, les industries manufacturières ont progressé de 1.9 %; il s'agissait là d'une régression de 1.7 point de pourcentage sur l'augmentation enregistrée au deuxième trimestre mais cela équivaut sensiblement aux augmentations trimestrielles moyennes de 1971. Les forêts et les bâtiments et travaux publics ont subi avec plus d'acuité les contre-coups des conflits de travail au deuxième qu'au troisième trimestre; elles ont connu des hausses respectives de 4.6 % et de 5.0 %. La diminution de 0.2 % dans les mines traduisait en partie la perte des rémunérations par les grévistes au troisième trimestre.

Les industries productrices de services ont progressé de 2.2 % contre 1.7 % au deuxième trimestre. Cette avance est attribuable aux augmentations de 3.3 % dans les services (1.7 % au deuxième trimestre) et de 3.5 % dans l'administration publique (-1.2 % au deuxième trimestre) à la suite du retour au travail des salariés québécois qui étaient en grève au deuxième trimestre. La régression de 1.4 % dans les transports, les communications et les autres services publics traduisait en partie les répercussions des conflits de travail en Ontario au troisième trimestre. L'augmentation de 2.4 % du commerce était de 1.7 point de pourcentage inférieure à l'augmentation du deuxième trimestre et d'environ 0.8 point de pourcentage inférieure à l'augmentation trimestrielle moyenne des quatre derniers trimestres. Les finances ont légèrement reculé, passant d'une augmentation de 2.1 % à 1.9 % du deuxième au troisième trimestre.

CONCEPTS AND METHODS

Labour Income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms(1).
- (b) Total employees as published in Estimates of Employees by Province and Industry, Catalogue No. 72-008, combined with average weekly earnings data based on large firms(1) only.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments(2).

Separate monthly estimates of wages and salaries are prepared for each province for eighteen industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate 1971 data and to project from November 1971 to obtain 1972 data, are shown below for the eighteen groups for which separate provincial estimates are prepared:

CONCEPTS ET MÉTHODES

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définies plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- (a) Indice de la rémunération dans les grandes entreprises(1).
- (b) Total des salariés, tiré de "Estimations du nombre d'employés par province et par industrie (n° 72-008 au catalogue), avec les gains hebdomadaires moyens dans les grandes entreprises(1) seulement.
- (c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour dix-huit branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de 1971 et à projeter les données de 1972 à partir des estimations de novembre 1971 figurent ci-dessous pour les dix-huit branches pour lesquelles il est établi des estimations au niveau provincial:

<p>Industry Groups — Branches d'activité économique</p>	<p>Projectors — Projecteurs</p>	<p>Weights — 1971 Total Wages and salaries equal 100 % — Poids — Rémunérations totales 1971 = 100 %</p>
<p>1. Agriculture.</p> <p>2. Fishing — Pêche.</p> <p>3. Hunting and trapping — Chasse et piégeage.</p> <p>4. Forestry — Forêts.</p> <p>5. Mining — Mines.</p> <p>6. Manufacturing — Industries manufacturières.</p> <p>7. Construction.</p> <p>8. Transportation, communication and other utilities — Transports, communications et autres services publics.</p> <p>9. Trade — Commerce.</p> <p>10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.</p> <p>11. Commercial services — Services commerciaux.</p> <p>12. No. 72-008, combined with a 3-month moving average of average earnings in large firms(1) for the industrial composite. — Nombre de salariés calculé pour la publication "Estimations du nombre d'employés par province et par industrie", n° 72-008 au catalogue, et moyenne mobile sur trois mois des gains moyens dans les grandes entreprises(1), pour l'ensemble des branches.</p> <p>Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Cat. No. 72-004. — Salaires et Traitements fondées sur les données établies pour "L'emploi dans l'administration fédérale", n° 72-004 au catalogue.</p> <p>Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Cat. No. 72-007. — Salaires et Traitements fondées sur les données établies pour "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue.</p> <p>Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment Cat. No. 72-009. — Salaires et Traitements fondées sur les données établies pour "L'emploi dans les administrations locales", n° 72-009 au catalogue.</p> <p>Projected on the same basis as federal administration. — Projections sur la même base que pour l'administration fédérale.</p>	<p>0.8</p> <p>0.1</p> <p>1.1</p> <p>2.5</p> <p>26.0</p> <p>8.0</p> <p>11.0</p> <p>13.5</p> <p>5.3</p> <p>7.7</p> <p>9.5</p> <p>5.2</p> <p>1.2</p> <p>3.7</p> <p>2.2</p> <p>2.1</p> <p>0.1</p>

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used (i.e. the provincial payroll indexes by industry of large firms(1) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Employment Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

This publication contains revised estimates as follows:

- (a) final annual estimates by industry, for the provinces and for Manufacturing from 1962 to 1968
 - (b) preliminary annual estimates by industry for the provinces and for Manufacturing from 1969 to 1971, and
 - (c) monthly estimates for preliminary data by industry, for the provinces and for Manufacturing, adjusted and not adjusted for seasonal variations, from January 1969 to date. (Final monthly estimates for the period 1947-1968 are available on request from the Employment Section, Statistics Canada.)
- (1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés (c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et (ou) de jours de paye pendant le mois.

Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la "Standard Industrial Classification" de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

La présente publication renferme les estimations rectifiées suivantes:

- (a) estimations annuelles finales, par branche d'activité économique, par province et pour les industries manufacturières de 1962 à 1968
 - (b) estimations annuelles provisoires par branche d'activité économique, par province et pour les industries manufacturières de 1969 à 1971 et
 - (c) estimations mensuelles provisoires par branche d'activité économique, par province et pour les industries manufacturières, désaisonnalisées et brutes, de janvier 1969 à aujourd'hui. (Ces estimations mensuelles finales pour la période 1947-1968 sont disponibles sur demande à la Section de l'emploi de Statistique Canada.)
- (1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins vingt personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période.

Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment Earnings and Hours, Cat. No. 72-002.

- (2) The results of these surveys are published in Federal Government Employment, Cat. No. 72-004, Provincial Government Employment, Cat. No. 72-007 and Local Government Employment, Cat. No. 72-009.

On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de "Employment, Earnings and Hours", n° 72-002 au catalogue.

- (2) Les résultats de ces enquêtes sont publiés dans "L'emploi dans l'administration fédérale", n° 72-004 au catalogue, "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue, et "L'emploi dans les administrations locales", n° 72-009 au catalogue.

PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

72-002 - Employment, Earnings and Hours, M. Angl.

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

72-005 - Estimations du Revenu du Travail; M. Bil.

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

72-008 - Estimations du nombre d'employés par province et par industrie, M. Bil.

(Estimations du nombre total d'employés; comparaisons avec les chiffres correspondants du mois précédent et de l'année précédente).

72-201 - Review of Employment and Average Weekly Wages and Salaries, A. Angl.

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: indices mensuels et annuels, pour une longue période; graphiques et notes explicatives).

72-202 - Review of Man-Hours and Hourly Earnings, A. Angl.

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région, données mensuelles et annuelles, pour une longue période; graphiques et notes explicatives).

72-204 - Earnings and Hours of Work in Manufacturing, 1969, Angl.

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, ouvriers et salariés, pour une semaine d'octobre, à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

72-206 - Indices de l'emploi désaisonnalisés. Janvier 1961 à décembre 1970, Bil.

(Indices de l'emploi, par activité économique et par région: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés et moyennes mobiles MDC; heures hebdomadaires moyennes et gains horaires moyens).

72-502 - Labour Income, 1926-1958 - épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

72-508 - Estimations du nombre d'employés par province et par industrie, 1961-1968, Bil.

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

72-510 - Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Bil.

72-511 - Coûts de la main-d'oeuvre au Canada-Mines, carrières et puits de pétrole, 1969, Bil.

(Publication annuelle couvrant diverses branches d'activité sur une base cyclique ou irrégulière. Estimations de certains coûts de main-d'oeuvre, par groupe d'activité économique et par région - Publication conjointe de la Division du travail de Statistique Canada et de la Direction de l'économie et des recherches du ministère du Travail du Canada).

72-601 - Gains et heures de travail au Canada - Commerce de détail, septembre 1970, Bil.

(Gains hebdomadaires moyens, gains horaires moyens et heures hebdomadaires moyennes des employés des deux sexes dans le commerce de détail, selon la situation, ("à plein temps", "à temps partiel et occasionnels" et rattachés au "siège social", pour le Canada, les provinces et certaines régions urbaines).

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et social du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 - Employment, Earnings and Hours, M., Engl.

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income, M. Bil.

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 - Estimates of Employees by Province and Industry, M. Bil.

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries, A. Engl.

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings, A. Engl.

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing, 1969 Engl.

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 - Seasonally-adjusted Employment Indexes, January 1961 - December 1970, Bil.

(Industry and area index numbers of employment: unadjusted, final seasonal factors, seasonally-adjusted and MCD moving average; average weekly hours and hourly earnings).

72-502 - Labour Income, 1926-58 - Out of print, Engl.

(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-508 - Estimates of Employees by Province and Industry, 1961-68, Bil.

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 - Labour Costs in Manufacturing 1968, Bil.

72-511 - Labour Costs in Canada, Mines, Quarries and Oil Wells 1969, Bil.

(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employer Labour Costs, by industry group and area - Report prepared jointly by Labour Division of Statistics Canada and Economics and Research Branch of Labour Canada).

72-601 - Earnings and Hours of Work in Canada - Retail Trade Industry, September 1970, Bil.

(Average Weekly Earnings, Average Hourly Earnings and Average Weekly Hours of Male and Female Employees in Retail Trade, by Employee Status i.e. "full-time", "part-time and casual" and "head office" employees for Canada, provinces and selected urban areas).

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

Salaires et traitements dans les industries manufacturières

Base: Classification type des industries de 1960

ESTIMATES OF LABOUR INCOME

Total labour income, unadjusted for seasonal variations, was estimated at \$4,956.8 million in October and at \$4,939.4 million in November, representing increases of 10.8 per cent and 10.9 per cent, respectively, over the same months in 1971.

November 1972

Seasonally-adjusted, the November estimate of total income advanced by 0.9 per cent, comparable to the monthly gains of the preceding three months. During the second and third quarters, the monthly estimates were affected to a significant degree by the effects of wages and salaries lost by employees on strike and/or by retro-active payments. However, for November, the effects of these irregularities on the total estimate were insignificant. The gain in wages and salaries for November, was mainly attributable to an increase in earnings.

Wages and salaries (seasonally-adjusted) in both the goods-producing and service-producing industries increased by 0.9 per cent as compared with gains for the previous month, of 0.9 per cent and 1.1 per cent, respectively. Among the goods-producing industries, manufacturing advanced by 0.8 per cent, a slight acceleration from the previous month. Construction, which has been depressed for most of the second and third quarters, due in part to industrial disputes, increased by 1.5 per cent. The primary industries advanced by 0.8 per cent.

The deceleration recorded in the service-producing industries was largely attributable to slowdowns in both transportation, communication, and other utilities, and in trade. The former group advanced by 0.6 per cent, a decline of 1.6 percentage points from the previous month which was affected in part by the settlement of a major industrial dispute. Trade, which for the most of the second and third quarters had shown little strength, increased by 2.2 per cent in October and by 0.9 per cent in November. Finance, insurance, and real estate increased by 0.7 per cent while the service industries advanced by 1.0 per cent. Public administration rose by 0.9 per cent, an increase of about 1.6 percentage points over the previous month.

ESTIMATIONS DU REVENU DU TRAVAIL

En chiffres bruts, le revenu total du travail a été estimé à \$4,956.8 millions en octobre et à \$4,939.4 millions en novembre, ce qui représente des hausses respectives de 10.8 % et de 10.9 % par rapport aux mêmes mois en 1971.

Novembre 1972

En novembre, l'estimation désaisonnalisée du revenu total du travail a progressé de 0.9 %; cette hausse est comparable aux augmentations mensuelles des trois mois précédents. Au cours du deuxième et du troisième trimestre, les estimations mensuelles ont été très touchées par les effets des traitements et salaires perdus par les grévistes et (ou) payés en rétroactivité. Toutefois, les contrecoups de ces irrégularités ne se sont presque pas fait sentir sur l'estimation totale de novembre. L'augmentation des traitements et salaires pour novembre est surtout imputable à une hausse des gains.

En chiffres désaisonnalisés, les traitements et salaires dans les industries productrices de biens et dans les industries productrices de services ont tous deux connu une hausse de 0.9 % par rapport aux augmentations du mois précédent (0.9 % et 1.1 % respectivement). Parmi les industries productrices de biens, les industries manufacturières ont progressé de 0.8 %, ce qui représente une légère avance par rapport au mois précédent. Le bâtiment et les travaux publics, qui avaient connu des baisses dues aux conflits de travail pour presque tout le deuxième et le troisième trimestre, ont augmenté de 1.5 %. Les industries primaires ont progressé de 0.8 %.

Le ralentissement enregistré dans les industries productrices de services est attribuable en grande partie au fléchissement de l'augmentation constaté aussi bien dans le groupe des transports, des communications, et autres services publics que dans le commerce. Dans le premier groupe il y a eu progression de 0.6 %, soit 1.6 point de pourcentage de moins qu'en octobre où l'on avait assisté au règlement d'un important conflit de travail. Le commerce, qui n'avait pas montré beaucoup de vigueur dans la majeure partie du deuxième et du troisième trimestre, a augmenté de 2.2 % en octobre et de 0.9 % en novembre. Les finances, les assurances et les affaires immobilières ont connu une hausse de 0.7 %, et les services de 1.0 %. L'administration publique a monté de 0.9 %, soit environ 1.6 point de pourcentage de plus qu'en octobre.

CONCEPTS AND METHODS

Labour Income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms(1).
- (b) Total employees as published in Estimates of Employees by Province and Industry, Catalogue No. 72-008, combined with average weekly earnings data based on large firms(1) only.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments(2).

Separate monthly estimates of wages and salaries are prepared for each province for eighteen industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate 1971 data and to project from November 1971 to obtain 1972 data, are shown below for the eighteen groups for which separate provincial estimates are prepared:

CONCEPTS ET MÉTHODES

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définies plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- (a) Indice de la rémunération dans les grandes entreprises(1).
- (b) Total des salariés, tiré de "Estimations du nombre d'employés par province et par industrie (n° 72-008 au catalogue), avec les gains hebdomadaires moyens dans les grandes entreprises(1) seulement.
- (c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour dix-huit branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de 1971 et à projeter les données de 1972 à partir des estimations de novembre 1971 figurent ci-dessous pour les dix-huit branches pour lesquelles il est établi des estimations au niveau provincial:

<p>Industry Groups — Branches d'activité économique</p>	<p>Projectors — Projecteurs</p>	<p>Weights — 1971 Total Wages and salaries equal 100 % — Poids — Rémunérations totales 1971 = 100 %</p>
1. Agriculture.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing — Pêche.	Value of fish caught and landed as published in Fisheries Statistics Cat. No. 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Cat. No. 23-207. — Valeur des poissons pris et débarqués, selon "La statistique mensuelle des pêches du Canada", n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication "Production de fourrures", n° 23-207 au catalogue.	0.1

11. Commercial services — Services commerciaux.		7.7
12. Education — Enseignement.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Cat. No. 72-008, combined with a 3-month moving average of average earnings in large firms(1) for the industrial composite. — Nombre de salariés calculé pour la publication "Estimations du nombre d'employés par province et par industrie", n° 72-008 au catalogue, et moyenne mobile sur trois mois des gains moyens dans les grandes entreprises(1), pour l'ensemble des branches.	9.5
13. Hospitals and Welfare organizations — Hôpitaux et services sociaux.		5.2
14. Religious organizations and private households — Organisations culturelles et ménages privés.		1.2
15. Federal administration — Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Cat. No. 72-004. — Salaires et Traitements fondées sur les données établies pour "L'emploi dans l'administration fédérale", n° 72-004 au catalogue.	3.7
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Cat. No. 72-007. — Salaires et Traitements fondées sur les données établies pour "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue.	2.2
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment Cat. No. 72-009. — Salaires et Traitements fondées sur les données établies pour "L'emploi dans les administrations locales", n° 72-009 au catalogue.	2.1
18. Other government offices — Autres services gouvernementaux.	Projected on the same basis as federal administration. — Projections sur la même base que pour l'administration fédérale.	0.1

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used (i.e. the provincial payroll indexes by industry of large firms(1) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Employment Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

This publication contains revised estimates as follows:

- (a) final annual estimates by industry, for the provinces and for Manufacturing from 1962 to 1968
 - (b) preliminary annual estimates by industry for the provinces and for Manufacturing from 1969 to 1971, and
 - (c) monthly estimates for preliminary data by industry, for the provinces and for Manufacturing, adjusted and not adjusted for seasonal variations, from January 1969 to date. (Final monthly estimates for the period 1947-1968 are available on request from the Employment Section, Statistics Canada.)
- (1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés (c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et (ou) de jours de paye pendant le mois.

Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la "Standard Industrial Classification" de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

La présente publication renferme les estimations rectifiées suivantes:

- (a) estimations annuelles finales, par branche d'activité économique, par province et pour les industries manufacturières de 1962 à 1968
- (b) estimations annuelles provisoires par branche d'activité économique, par province et pour les industries manufacturières de 1969 à 1971 et
- (c) estimations mensuelles provisoires par branche d'activité économique, par province et pour les industries manufacturières, désaisonnalisées et brutes, de janvier 1969 à aujourd'hui. (Ces estimations mensuelles finales pour la période 1947-1968 sont disponibles sur demande à la Section de l'emploi de Statistique Canada.)

- (1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins vingt personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période.

Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment Earnings and Hours, Cat. No. 72-002.

- (2) The results of these surveys are published in Federal Government Employment, Cat. No. 72-004, Provincial Government Employment, Cat. No. 72-007 and Local Government Employment, Cat. No. 72-009.

On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de "Employment, Earnings and Hours", n° 72-002 au catalogue.

- (2) Les résultats de ces enquêtes sont publiés dans "L'emploi dans l'administration fédérale", n° 72-004 au catalogue, "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue, et "L'emploi dans les administrations locales", n° 72-009 au catalogue.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 - Employment, Earnings and Hours, M., Engl.

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income, M. Bil.

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 - Estimates of Employees by Province and Industry, M. Bil.

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries, A. Engl.

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings, A. Engl.

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing, 1969 Engl.

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 - Seasonally-adjusted Employment Indexes, January 1961 - December 1970, Bil.

(Industry and area index numbers of employment: unadjusted, final seasonal factors, seasonally-adjusted and MCD moving average; average weekly hours and hourly earnings).

72-502 - Labour Income, 1926-58 - Out of print, Engl.

(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-508 - Estimates of Employees by Province and Industry, 1961-68, Bil.

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 - Labour Costs in Manufacturing 1968, Bil.

72-511 - Labour Costs in Canada, Mines, Quarries and Oil Wells 1969, Bil.

(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employer Labour Costs, by industry group and area - Report prepared jointly by Labour Division of Statistics Canada and Economics and Research Branch of Labour Canada).

72-601 - Earnings and Hours of Work in Canada - Retail Trade Industry, September 1970, Bil.

(Average Weekly Earnings, Average Hourly Earnings and Average Weekly Hours of Male and Female Employees in Retail Trade, by Employee Status i.e. "full-time", "part-time and casual" and "head office" employees for Canada, provinces and selected urban areas).

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

72-002 – Employment, Earnings and Hours, M. Angl.

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

72-005 – Estimations du Revenu du Travail; M. Bil.

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

72-008 – Estimations du nombre d'employés par province et par industrie, M. Bil.

(Estimations du nombre total d'employés; comparaisons avec les chiffres correspondants du mois précédent et de l'année précédente).

72-201 – Review of Employment and Average Weekly Wages and Salaries, A. Angl.

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: indices mensuels et annuels, pour une longue période; graphiques et notes explicatives).

72-202 – Review of Man-Hours and Hourly Earnings, A. Angl.

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région, données mensuelles et annuelles, pour une longue période; graphiques et notes explicatives).

72-204 – Earnings and Hours of Work in Manufacturing, 1969, Angl.

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, ouvriers et salariés, pour une semaine d'octobre, à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

72-206 – Indices de l'emploi désaisonnalisés. Janvier 1961 à décembre 1970, Bil.

(Indices de l'emploi, par activité économique et par région: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés et moyennes mobiles MDC; heures hebdomadaires moyennes et gains horaires moyens).

72-502 – Labour Income, 1926-1958 – épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

72-508 – Estimations du nombre d'employés par province et par industrie, 1961-1968, Bil.

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

72-510 – Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Bil.

72-511 – Coûts de la main-d'oeuvre au Canada-Mines, carrières et puits de pétrole, 1969, Bil.

(Publication annuelle couvrant diverses branches d'activité sur une base cyclique ou irrégulière. Estimations de certains coûts de main-d'oeuvre, par groupe d'activité économique et par région – Publication conjointe de la Division du travail de Statistique Canada et de la Direction de l'économie et des recherches du ministère du Travail du Canada).

72-601 – Gains et heures de travail au Canada – Commerce de détail, septembre 1970, Bil.

(Gains hebdomadaires moyens, gains horaires moyens et heures hebdomadaires moyennes des employés des deux sexes dans le commerce de détail, selon la situation, ("à plein temps", "à temps partiel et occasionnels" et rattachés au "siège social", pour le Canada, les provinces et certaines régions urbaines).

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et social du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, K1A 0T6.

ESTIMATES OF LABOUR INCOME

(Adjusted for Seasonal Variations)

Fourth quarter 1972

During the fourth quarter of 1972, total labour income advanced by 3.7 %, a marked acceleration over the 2.4 % gain experienced in the third quarter. The fourth quarter estimate was affected, in part, by large retro-active payments especially those made by the Quebec government to employees in non-commercial and government services.

In the goods-producing industries, wages and salaries increased by 3.4 %, as compared to gains of 2.4 % in both the second and third quarters. Within this group, the primary industries advanced by 9.9 %. During August and September, significant employment gains were experienced within this group, mainly owing to the settlement of industrial disputes in Newfoundland, Quebec, and British Columbia and these monthly levels were maintained throughout the fourth quarter. Wages and salaries in manufacturing rose by 3.3 %, a gain of 1.1 percentage points from that recorded in the third quarter. Construction remained virtually unchanged from the third quarter.

Wages and salaries, in the service-producing industries increased by 3.9 %, a marked acceleration from the gain of 2.4 % recorded in the third quarter. Transportation, communication, and other utilities increased by 4.8 %, as compared with a decline of 0.7 % in the third quarter. Most of this acceleration was in Ontario, due in part to the settlement of industrial disputes. Trade advanced by 4.1 % after being depressed throughout most of the third quarter. Finance, insurance, and real estate increased by 3.2 % and commercial service by 1.8 %. In non-commercial service, the estimates for the second and third quarters were depressed owing to the effects of industrial disputes while those for the fourth quarter were influenced by the inclusion of retro-active payments. Wages and salaries in public administration advanced by 5.1 % with the estimates being affected by the inclusion of retro-active payments in both federal and provincial governments.

Annual 1972

Preliminary estimates indicate that total labour income increased by 10.9 % during 1972 as compared with a gain of 9.9 % in 1971. Part of this advance, however, was due to legislative changes to the Unemployment Insurance Act as increased coverage and contribution rates came into effect at the beginning of the year. Removing the supplementary labour income estimates (of which the employers' contribution to the Unemployment Insurance Fund is a part) from the total labour income estimates, the increase in total wages and salaries was 10.6 %. This increase represents a gain of 0.6 percentage points over that recorded in 1971 and although it is significantly greater than the 8.5 % recorded in 1970, it does fall short of the 12.1 % increase recorded in 1969. During 1972, the effects of wages and salaries lost by employees involved in industrial disputes was nearly three times as large as those recorded in 1971, and represents the largest amount lost since these statistics were first compiled. In 1972, the majority of the industrial disputes were concentrated in forestry, construction, non-commercial service, and provincial administration. The amount of retro-active payments paid during 1972 was approxima-

ESTIMATIONS DU REVENU DU TRAVAIL

(Après désaisonnalisation)

Quatrième trimestre 1972

Au quatrième trimestre 1972, le revenu total du travail a augmenté de 3.7 %, ce qui est nettement plus que la hausse de 2.4 % observée au troisième trimestre. L'estimation pour le quatrième trimestre a été influencée en partie par d'importants paiements rétroactifs, principalement ceux qu'a versé le gouvernement du Québec aux salariés des services non commerciaux et publics.

Dans les industries productrices de biens, les traitements et salaires ont augmenté de 3.4 %, comparativement à 2.4 % aux deuxième comme au troisième trimestres. Dans ce groupe, les industries primaires ont connu une progression de 9.9 %. En août et septembre, d'importantes augmentations de l'emploi se sont produites dans ce groupe à la suite principalement du règlement de conflits du travail à Terre-Neuve, au Québec et en Colombie-Britannique, et ces niveaux mensuels se sont maintenus tout au long du quatrième trimestre. Les traitements et salaires dans les industries manufacturières ont progressé de 3.3 %, ce qui représente un gain de 1.1 point de pourcentage par rapport au troisième trimestre. Pour ce qui est du bâtiment et des travaux publics, le revenu du travail est resté pratiquement inchangé depuis le troisième trimestre.

Dans les industries productrices de services, les traitements et salaires ont augmenté de 3.9 %, ce qui est une progression notable par rapport au gain de 2.4 % observé au trimestre précédent. Les transports, les télécommunications et les autres services publics ont connu une augmentation de 4.8 %, alors qu'il y avait eu une baisse de 0.7 % au troisième trimestre. La majeure partie de cette augmentation s'est concentrée en Ontario, en partie à la suite du règlement de conflits du travail. Pour ce qui est du commerce, le revenu du travail est monté de 4.1 %, après avoir été déprimé pendant tout le troisième trimestre. Dans les finances, les assurances et les affaires immobilières, les traitements et salaires ont augmenté de 3.2 % et de 1.8 % dans les services commerciaux. Pour ce qui est des services non commerciaux, les estimations des deuxième et troisième trimestres accusent un recul par suite de conflits du travail, tandis que celles du quatrième trimestre ont subi l'influence de paiements rétroactifs. Les traitements et salaires dans l'administration publique ont progressé de 5.1 %, mais les estimations ont été affectées par l'inclusion de paiements rétroactifs de l'administration fédérale et les administrations provinciales.

Revue annuelle 1972

Les estimations préliminaires montrent que le revenu total du travail a augmenté de 10.9 % en 1972, contre 9.9 % en 1971. Une partie de cette progression, cependant, est imputable à des changements de la législation sur l'assurance-chômage, car au début de l'année on a procédé à une extension des garanties et à une hausse du taux des contributions. Si l'on déduit les estimations du revenu supplémentaire du travail (dont les contributions des employeurs à la Caisse d'assurance-chômage font partie) des estimations du revenu total du travail, on obtient un accroissement du total des traitements et salaires de 10.6 %. Cette augmentation constitue une progression de 0.6 point par rapport à 1971; bien que nettement supérieure à l'augmentation de 8.5 % observée en 1970, elle n'en est pas moins inférieure à celle de 12.1 % observée en 1969. En 1972, le montant perdu par les salariés au cours de conflits du travail était presque le triple de celui de 1971, et il est le plus élevé jamais enregistré depuis que l'on recueille ces statistiques. En 1972, la plupart des conflits du travail se concentraient dans les industries des forêts, du bâtiment et des travaux publics, des services non commerciaux et de l'administration publique provinciale. Le total des paiements rétroactifs versés en 1972 dépassait d'environ 17 % celui versé en 1971; de ce chiffre, plus du tiers étaient des paiements

tely 17 % larger than those of 1971 with over one-third of these payments paid by the Quebec government to employees in non-commercial and government services. It was estimated that if these irregularities were removed from the estimates, the gain in 1972 would have been 10.9 % as compared with 9.6 % in 1971. Nearly seventy-five per cent of this increase was attributable to average earnings.

Wages and salaries in the goods-producing industries advanced by 8.4 %, a decline of 0.3 percentage points from that recorded in 1971. Effects of wages and salaries lost by employees involved in industrial disputes was at least twice as large as that recorded in 1971 with the majority of these disputes occurring in the province of British Columbia in the forestry and construction industries. Nearly all of the gain in 1972 was attributable to average earnings.

In the service-producing industries, wages and salaries increased by 12.0 % as compared with gains of 10.8 %, 10.0 % and 13.8 % in 1971, 1970, and 1969 respectively. The gain was attributable to both average earnings and employment.

du gouvernement du Québec aux salariés des services non commerciaux et des services publics. On a estimé que sans ces anomalies, le gain en 1972 aurait été de 10.9 %, contre 9.6 % en 1971. Près de 75 % de cette hausse est imputable aux gains moyens.

Les traitements et salaires dans les industries productrices de biens ont progressé de 8.4 %, soit 0.3 point de pourcentage de moins qu'en 1971. Le montant perdu par les salariés au cours de conflits du travail était au moins le double de celui de 1971; la plupart des conflits se sont concentrés en Colombie-Britannique, dans les industries des forêts et du bâtiment et travaux publics. La progression constatée en 1972 est presque entièrement imputable aux gains moyens.

Dans les industries productrices de services, la hausse des traitements et salaires a été de 12.0 %, contre 10.8 % en 1971, 10.0 % en 1970 et 13.8 % en 1969. La progression est imputable aux gains moyens et à l'emploi.

See footnote(s) at bottom of Table 3. — Voir renvoi(s) au bas du Tableau 3.

Labour Income is defined as the compensation paid to employees for services rendered comprising wages and salaries and supplementary labour income. It includes all such payments made to residents of Canada (Canadians employed by the federal government abroad are considered to be residents of Canada) except those made to the Canadian Armed Forces. Remuneration to the latter fits the definition of labour income but are excluded here as they are treated as a separate item in the National Income Accounts.

Wages and salaries include directors' fees, bonuses, commissions and taxable allowances and benefits. A gross concept has been adopted, and wages and salaries are measured before deductions for employees' contributions to income tax, unemployment insurance, pension funds, etc. Supplementary labour income, which is defined as payments made by employers for future benefit of employees, is composed of employers' contributions to employee welfare and pension funds including the Canada and Quebec pension plans, to the workmen's compensation funds, and to unemployment insurance.

The general method used in the preparation of the labour income estimates is to establish annual data or benchmarks by province for selected industry groups and to allocate these data by month.

The annual estimates are based in most cases on data derived from monthly and annual full-coverage and sample surveys conducted by Statistics Canada, the decennial and quinquennial censuses of Canada and the public accounts of the federal and provincial governments. These estimates are adjusted in light of the aggregations of employers' reports to the Department of National Revenue which yield a close approximation to total wages and salaries as defined above.

The main indicators used to interpolate and extrapolate census data, project annual data and allocate national data to provinces are one or more of the following:

- (a) A payroll index for large firms(1).
- (b) Total employees as published in Estimates of Employees by Province and Industry, Catalogue No. 72-008, combined with average weekly earnings data based on large firms(1) only.
- (c) Monthly payroll derived from the surveys of employment and payroll in the federal, provincial and municipal governments(2).

Separate monthly estimates of wages and salaries are prepared for each province for eighteen industry groups (see below). The last annual estimates are allocated to months and the resulting estimates for the month of November are projected to current months using related indicators. Over the years the methods of building up the indicators have changed but generally the same main sources were used.

The indicators used to allocate 1971 data and to project from November 1971 to obtain 1972 data, are shown below for the eighteen groups for which separate provincial estimates are prepared:

Le revenu du travail est la compensation versée aux salariés pour les services qu'ils rendent. Il comprend les salaires et traitements et le revenu supplémentaire du travail des résidents du Canada (les Canadiens employés par le gouvernement fédéral à l'étranger sont considérés comme des résidents du Canada), à l'exception des membres des Forces armées canadiennes. La rémunération de ces derniers répond à la définition du revenu du travail, mais elle n'est pas comprise ici parce qu'elle forme un poste distinct dans les Comptes nationaux.

Les salaires et traitements comprennent les jetons de présence des administrateurs, les gratifications et les commissions, ainsi que les allocations et les prestations imposables. Le revenu du travail est fondé sur des chiffres bruts: la rémunération est donc établie avant déduction de l'impôt sur le revenu, des cotisations d'assurance-chômage, à des caisses de retraite, etc. Le revenu supplémentaire du travail (paiements faits par l'employeur pour l'avantage futur de ses salariés) comprend les cotisations des employeurs aux caisses de retraite et aux régimes de prévoyance des salariés y compris le Régime de pensions du Canada et le Régime de rentes du Québec, aux caisses d'indemnisation des accidents du travail et à l'assurance-chômage.

La méthode générale utilisée dans la préparation des estimations du revenu du travail consiste à établir des données annuelles ou de référence, par province, pour certaines branches d'activité économique, et à répartir ces données par mois.

Les estimations annuelles sont fondées dans la plupart des cas sur des données tirées d'enquêtes exhaustives ou par échantillon, menées mensuellement ou annuellement par Statistique Canada, des recensements décennaux et quinquennaux du Canada et des comptes publics des administrations fédérale et provinciales. Ces estimations sont rectifiées à la lumière des déclarations que les employeurs transmettent au ministère du Revenu national et qui donnent une idée assez juste du total des salaires et traitements définies plus haut.

Les principaux indicateurs utilisés pour interpoler et extrapoler les données de recensement, pour projeter les données annuelles et pour répartir les données nationales par province sont les suivantes:

- (a) Indice de la rémunération dans les grandes entreprises(1).
- (b) Total des salariés, tiré de "Estimations du nombre d'employés par province et par industrie (n° 72-008 au catalogue), avec les gains hebdomadaires moyens dans les grandes entreprises(1) seulement.
- (c) Rémunérations mensuelles indiquées lors d'enquêtes sur l'emploi et la rémunération dans les administrations fédérale, provinciales et municipales(2).

Il est établi des estimations mensuelles des salaires et traitements pour chaque province pour dix-huit branches d'activité économique (voir ci-dessous). Les dernières estimations annuelles sont réparties par mois et les estimations qui en découlent pour novembre sont projetées pour les mois courants à l'aide des indicateurs pertinents. Les méthodes de construction des indicateurs ont changé au long des années, mais les principales sources sont demeurées les mêmes en général.

Les indicateurs qui ont servi à répartir les données de 1971 et à projeter les données de 1972 à partir des estimations de novembre 1971 figurent ci-dessous pour les dix-huit branches pour lesquelles il est établi des estimations au niveau provincial:

Industry Groups — Branches d'activité économique	Projectors — Projecteurs	Weights — 1971 Total Wages and salaries equal 100 % — Poids — Rémunérations totales 1971 = 100 %
1. Agriculture.	Previous year's trend used to allocate estimated annual totals — Tendance de l'année précédente utilisée pour répartir les estimations annuelles.	0.8
2. Fishing — Pêche.		
3. Hunting and trapping — Chasse et piègeage.	Value of fish caught and landed as published in Fisheries Statistics Cat. No. 24-002 and value of wild life for production tabulated in connection with the preparation of Fur Production, Cat. No. 23-207. — Valeur des poissons pris et débarqués, selon "La statistique mensuelle des pêches du Canada", n° 24-002 au catalogue, et valeur de la production de fourrures d'animaux sauvages, établie aux fins de la publication "Production de fourrures", n° 23-207 au catalogue.	0.1
4. Forestry — Forêts.		1.1
5. Mining — Mines.		2.5
6. Manufacturing — Industries manufacturières.	Payroll index of large firms(1) obtained from data tabulated in connection with the preparation of Employment Earnings and Hours, Cat. No. 72-002. — Indice de la rémunération dans les grandes entreprises(1), tiré des données calculées pour la publication "Emploi, gains et heures de travail" n° 72-002 au catalogue.	26.0
7. Construction.		8.0
8. Transportation, communication and other utilities — Transports, communications et autres services publics.		11.0
9. Trade — Commerce.		13.5
10. Finance, insurance and real estate — Finances, assurances et affaires immobilières.		5.3
11. Commercial services — Services commerciaux.		7.7
12. Education — Enseignement.	Number of employees as tabulated for the preparation of Estimates of Employees by Province and Industry, Cat. No. 72-008, combined with a 3-month moving average of average earnings in large firms(1) for the industrial composite. — Nombre de salariés calculé pour la publication "Estimations du nombre d'employés par province et par industrie", n° 72-008 au catalogue, et moyenne mobile sur trois mois des gains moyens dans les grandes entreprises(1), pour l'ensemble des branches.	9.5
13. Hospitals and Welfare organizations — Hôpitaux et services sociaux.		5.2
14. Religious organizations and private households — Organisations culturelles et ménages privés.		1.2
15. Federal administration — Administration fédérale.	Wages and salaries obtained from data tabulated in connection with the preparation of Federal Government Employment, Cat. No. 72-004. — Salaires et Traitements fondées sur les données établies pour "L'emploi dans l'administration fédérale", n° 72-004 au catalogue.	3.7
16. Provincial administration — Administrations provinciales.	Wages and salaries obtained from data tabulated in connection with the preparation of Provincial Government Employment, Cat. No. 72-007. — Salaires et Traitements fondées sur les données établies pour "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue.	2.2
17. Local administration — Administrations locales.	Wages and salaries obtained from data tabulated in connection with the preparation of Local Government Employment Cat. No. 72-009. — Salaires et Traitements fondées sur les données établies pour "L'emploi dans les administrations locales", n° 72-009 au catalogue.	2.1
18. Other government offices — Autres services gouvernementaux.	Projected on the same basis as federal administration. — Projections sur la même base que pour l'administration fédérale.	0.1

The monthly estimates of wages and salaries are measures of payments that would be received if workers were paid at the end of "months" consisting of approximately four and one-third weeks each. This is because most projectors used (i.e. the provincial payroll indexes by industry of large firms(1) are on a weekly basis. Other projectors are adjusted, as required, to eliminate fluctuations caused by variations in the number of working and/or pay days during the month.

Statistical Presentation

The latest monthly figures are advance estimates based on a limited number of early returns of employment reports. They have a lesser degree of reliability than the estimates for the immediately preceding month and the previous month which are based on more complete information. Estimates for other months and those for recent years are revised as new annual data become available.

The monthly figures in this report are presented to the nearest tenth of a million dollars. This is done in order to avoid sudden changes in estimates for small provinces or industries which would occur if the figures were rounded to the nearest million. It should not be assumed that the estimates are necessarily accurate to the nearest tenth of a million.

Estimates of labour income based on the 1948 Standard Industrial Classification have been published from 1926 to 1969 and are available on request from the Employment Section, Statistics Canada. Those based on the 1960 Standard Industrial Classification were originally published in 1969 for the period 1951-1968. These estimates were projected to the end of 1971. The entire series (1951-1971) has been revised and carried back to 1947.

This publication contains revised estimates as follows:

- (a) final annual estimates by industry, for the provinces and for Manufacturing from 1962 to 1968
 - (b) preliminary annual estimates by industry for the provinces and for Manufacturing from 1969 to 1971, and
 - (c) monthly estimates for preliminary data by industry, for the provinces and for Manufacturing, adjusted and not adjusted for seasonal variations, from January 1969 to date. (Final monthly estimates for the period 1947-1968 are available on request from the Employment Section, Statistics Canada.)
- (1) Employment and earnings data in firms employing at least 20 employees during the last seven days of any month of the year are collected and tabulated each month. The payroll index referred to here is derived from the gross earnings tabulated from these reports for the last pay period of the month adjusted to represent the whole month. Gross earnings include salaries, straight time wages, piecework and regular commission earnings, regularly paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey week. Average weekly earnings is obtained by dividing gross earnings as defined above by the number of employees reported for the same period.

Les estimations mensuelles des salaires et traitements sont une mesure des sommes que toucheraient les travailleurs s'ils étaient payés à la fin de "mois" composés d'à peu près quatre semaines et un tiers chacun. C'est que la plupart des projecteurs utilisés (c.-à-d. les indices de rémunérations par province et par branche pour les grandes entreprises) sont établis sur une base hebdomadaire. Les autres projecteurs sont rectifiés, au besoin, pour éliminer les fluctuations dues à la variation du nombre de jours ouvrages et (ou) de jours de paye pendant le mois.

Présentation statistique

Les plus récents chiffres mensuels sont des estimations préliminaires fondées sur un échantillon limité des premières déclarations d'emploi reçues. Ils ne sont pas aussi fiables que les estimations visant le dernier et l'avant-dernier mois, qui sont basées sur des renseignements plus complets. Les estimations des autres mois et des années récentes sont rectifiées à mesure que les nouvelles autres données annuelles sont disponibles.

Les chiffres mensuels publiés ici sont établis au dixième de million de dollars près. Cela permet d'éviter les changements subits qui se produiraient dans le cas des petites provinces ou des petites branches si ces chiffres étaient arrondis au million. Il ne faut pas supposer que les estimations sont nécessairement exactes au dixième de million près.

Les estimations du revenu du travail fondées sur la "Standard Industrial Classification" de 1948 ont été publiées de 1926 à 1969 et sont disponibles sur demande à la Section de l'emploi, Statistique Canada. Les estimations basées sur la Classification type des industries de 1960 ont été publiées d'abord en 1969 pour la période 1951-1968. Ces estimations ont fait l'objet de projections jusqu'à la fin de 1971. La série entière (1951-1971) a été rectifiée et reportée à 1947.

La présente publication renferme les estimations rectifiées suivantes:

- (a) estimations annuelles finales, par branche d'activité économique, par province et pour les industries manufacturières de 1962 à 1968
 - (b) estimations annuelles provisoires par branche d'activité économique, par province et pour les industries manufacturières de 1969 à 1971 et
 - (c) estimations mensuelles provisoires par branche d'activité économique, par province et pour les industries manufacturières, désaisonnalisées et brutes, de janvier 1969 à aujourd'hui. (Ces estimations mensuelles finales pour la période 1947-1968 sont disponibles sur demande à la Section de l'emploi de Statistique Canada.)
- (1) Les données sur l'emploi et sur les gains dans les entreprises employant au moins vingt personnes pendant les sept derniers jours de n'importe quel mois de l'année sont recueillies et exploitées chaque mois. L'indice de la rémunération mentionné ici provient des gains bruts que l'on établit en gonflant les chiffres relatifs à la dernière période de paye de chaque mois pour représenter tout le mois. Les gains bruts comprennent la rémunération, les gains aux taux ordinaires, le travail aux pièces et les commissions régulières, les primes au rendement, les primes de vie chère et les autres gratifications versées régulièrement, les gains pour travail supplémentaire et les paiements versés aux personnes en congé payé pendant la semaine de l'enquête. On obtient les gains hebdomadaires moyens en divisant les gains bruts définis plus haut par le nombre de salariés déclarés pour la même période.

Further detail regarding concepts, methodology, coverage and data tabulated from this survey will be found in a current issue of Employment Earnings and Hours, Cat. No. 72-002.

- (2) The results of these surveys are published in Federal Government Employment, Cat. No. 72-004, Provincial Government Employment, Cat. No. 72-007 and Local Government Employment, Cat. No. 72-009.

On trouvera plus de détails sur les concepts, la méthodologie, le champ d'observation et les données de l'enquête dans un récent numéro de "Employment, Earnings and Hours", n° 72-002 au catalogue.

- (2) Les résultats de ces enquêtes sont publiés dans "L'emploi dans l'administration fédérale", n° 72-004 au catalogue, "L'emploi dans les administrations publiques provinciales", n° 72-007 au catalogue, et "L'emploi dans les administrations locales", n° 72-009 au catalogue.

EMPLOYMENT AND PAYROLL REPORTS

Following are publications of the Labour Division based upon establishment data in the field of industrial employment, payrolls and hours:

72-002 - Employment, Earnings and Hours, M., Engl.

(Industry and area index numbers of employment and payrolls, averages of weekly earnings, salaries and wages, averages of hours per week and hourly earnings; historical comparisons; charts and explanatory material).

72-005 - Estimates of Labour Income, M. Bil.

(Monthly estimates of wages, salaries and supplementary labour income, both unadjusted and seasonally adjusted, for specific industries and regions; with annual totals covering a 10 year period).

72-008 - Estimates of Employees by Province and Industry, M. Bil.

(Estimates of total numbers of employees, with comparisons with a month and a year earlier).

72-201 - Review of Employment and Average Weekly Wages and Salaries, A. Engl.

(Industry and area index numbers of employment and payrolls and average weekly wages and salaries, monthly and annually, over a lengthy period; charts and explanatory material).

72-202 - Review of Man-Hours and Hourly Earnings, A. Engl.

(Industry and area averages of hours per week, hourly and weekly wages, monthly and annually, over a lengthy period; charts and explanatory material).

72-204 - Earnings and Hours of Work in Manufacturing, 1969 Engl.

(Separate figures of earnings and hours for men and women and for salaried employees and wage-earners in one week in October from 1946 with industrial and area detail; charts and explanatory material. Special data are obtained on a rotational basis in successive years).

72-206 - Seasonally-adjusted Employment Indexes, January 1961 - December 1970, Bil.

(Industry and area index numbers of employment: unadjusted, final seasonal factors, seasonally-adjusted and MCD moving average; average weekly hours and hourly earnings).

72-502 - Labour Income, 1926-58 - Out of print, Engl.

(A record of annual estimates of labour income from 1926 to 1958, along with monthly figures from 1947; contains explanations of sources, methods and concepts).

72-508 - Estimates of Employees by Province and Industry, 1961-68, Bil.

(Estimates of total numbers of employees, monthly and annually, for major industrial divisions, Canada and provinces; contains a review of concepts, sources and methods and indicators of sampling variability).

72-510 - Labour Costs in Manufacturing 1968, Bil.

72-511 - Labour Costs in Canada, Mines, Quarries and Oil Wells 1969, Bil.

(An annual publication covering various industries on a cycle or occasional basis. Estimates of selected employer Labour Costs, by industry group and area - Report prepared jointly by Labour Division of Statistics Canada and Economics and Research Branch of Labour Canada).

72-601 - Earnings and Hours of Work in Canada - Retail Trade Industry, September 1970, Bil.

(Average Weekly Earnings, Average Hourly Earnings and Average Weekly Hours of Male and Female Employees in Retail Trade, by Employee Status i.e. "full-time", "part-time and casual" and "head office" employees for Canada, provinces and selected urban areas).

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

PUBLICATIONS SUR L'EMPLOI ET LA RÉMUNÉRATION

Les publications suivantes de la Division du travail contiennent des données sur l'emploi, la rémunération et les heures de travail dans l'industrie, d'après le concept de l'établissement:

72-002 — Employment, Earnings and Hours, M. Angl.

(Indices de l'emploi et de la rémunération, par région et par activité économique; moyennes des gains et des rémunérations hebdomadaires, heures hebdomadaires moyennes et gains horaires moyens; comparaisons chronologiques; graphiques et notes explicatives).

72-005 — Estimations du Revenu du Travail; M. Bil.

(Estimations mensuelles, brutes et désaisonnalisées, des rémunérations et du revenu supplémentaire du travail, pour certaines activités économiques et certaines régions; avec totaux annuels pour une période de 10 ans).

72-008 — Estimations du nombre d'employés par province et par industrie, M. Bil.

(Estimations du nombre total d'employés; comparaisons avec les chiffres correspondants du mois précédent et de l'année précédente).

72-201 — Review of Employment and Average Weekly Wages and Salaries, A. Angl.

(Indices de l'emploi et de la rémunération et rémunérations hebdomadaires moyennes, par activité économique et par région: indices mensuels et annuels, pour une longue période; graphiques et notes explicatives).

72-202 — Review of Man-Hours and Hourly Earnings, A. Angl.

Heures hebdomadaires moyennes et rémunération horaire et hebdomadaire moyenne, par activité économique et par région, données mensuelles et annuelles, pour une longue période; graphiques et notes explicatives).

72-204 — Earnings and Hours of Work in Manufacturing, 1969, Angl.

(Données distinctes sur les gains et les heures de travail des hommes et des femmes, ouvriers et salariés, pour une semaine d'octobre, à partir de 1946, réparties par activité économique et par région; graphiques et notes explicatives. Des données spéciales sont obtenues par voie de rotation d'année en année).

72-206 — Indices de l'emploi désaisonnalisés. Janvier 1961 à décembre 1970, Bil.

(Indices de l'emploi, par activité économique et par région: non désaisonnalisés, facteurs finals de désaisonnalisation, désaisonnalisés et moyennes mobiles MDC; heures hebdomadaires moyennes et gains horaires moyens).

72-502 — Labour Income, 1926-1958 — épuisé, Angl.

(Estimations annuelles du revenu du travail, de 1926 à 1958, avec chiffres mensuels à partir de 1947; explications des sources, des méthodes et des concepts.)

72-508 — Estimations du nombre d'employés par province et par industrie, 1961-1968, Bil.

(Estimations du nombre total de salariés, par mois et par année, pour les principales divisions d'activité économique, Canada et provinces. Revue des concepts, des sources et des méthodes et indicateurs de la variabilité d'échantillonnage.)

72-510 — Coûts de la main-d'oeuvre dans l'industrie manufacturière, 1968, Bil.

72-511 — Coûts de la main-d'oeuvre au Canada-Mines, carrières et puits de pétrole, 1969, Bil.

(Publication annuelle couvrant diverses branches d'activité sur une base cyclique ou irrégulière. Estimations de certains coûts de main-d'oeuvre, par groupe d'activité économique et par région — Publication conjointe de la Division du travail de Statistique Canada et de la Direction de l'économie et des recherches du ministère du Travail du Canada).

72-601 — Gains et heures de travail au Canada — Commerce de détail, septembre 1970, Bil.

(Gains hebdomadaires moyens, gains horaires moyens et heures hebdomadaires moyennes des employés des deux sexes dans le commerce de détail, selon la situation, ("à plein temps", "à temps partiel et occasionnels" et rattachés au "siège social", pour le Canada, les provinces et certaines régions urbaines).

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et social du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, KIA OT6.
